CATEGORICAL EXCLUSION REVIEW

Background: The Eugene District's Resource Management Plan (June 1995), includes the intensive forest management practice of pruning. Pruning promotes development of clear wood in the first log enhancing wood quality and value for future harvests. Removal of the lower limbs reduces the ladder fuels which may limit torching in the event of wildfire.

Proposed Action: The proposed action is to implement a program of Pruning on approximately 502 acres within the Upper Willamette Resource Area. This project will be accomplished primarily by contracting for removing all branches below a specified height with hand tools (pruning saws or loppers).

Decision: The proposed action described is approved to be carried out during calendar 2003/2004.

Rational: The proposed action qualifies as categorical exclusion C.4., as described in the Department Manual 516 DM 6, Appendix 5, and does not meet any of the exception criteria. The Proposed Action is in conformance with the "Record of Decision for Amendments to Forest Service and Bureau of Land Management Planning documents within the Range of the Northern Spotted Owl" (April 1994), and the "Eugene District Record of Decision and Resource Management Plan" (June 1995). The Proposed Action and recommended mitigation measures are consistent with the District Final SEIS.
